

Alchemist IPSEC VPN AI Analyser

IPSEC VPN Traffic & AI Analysis Report

ANALYSIS TYPE	Passive PCAP
GENERATED	10 Sep 2026, 15:34:29 UTC
ANALYSIS ID	01a0852a-d082-71f6-bd77-4c2a49ac11ef
INPUT	PCAP file capture.pcap

Table of Contents

Only sections supported by available analysis data are included.

01	Executive Summary	3
02	Analysis Overview	4
03	Progress Flow	5
04	Traffic Analysis	6
05	Flows	7
06	IPSEC / VPN Analysis	8
07	VPN Sessions	9
08	Passive Analysis	10
09	Traffic Classification	11
10	Evidence	12
11	Security Findings	19
12	Recommendations	20
13	Risk & Fixes	21
14	System Health	22
15	Conclusion	23
16	Appendix: Evidence Conclusions	24

Executive Summary

The passive pcap analysis completed with 20 fused conclusions from the evidence available to the system.

The deterministic security assessment scored the supported evidence 97 out of 100 (grade A), with low risk and 70.0% assessment confidence. 6 evidence items remained unknown.

The assessment produced 1 supported finding(s). The highest-priority items are listed in Security Findings and Recommendations.

ESP payloads were not decrypted. Traffic classifications, when present, are metadata-based estimates and not protocol facts.

Analysis Overview

Metric	Value
Analysis type	Passive PCAP
Analysis state	Completed
Final stage	Completed
Started	09 Sep 2026, 07:56:10 UTC
Completed / updated	09 Sep 2026, 07:56:11 UTC
Duration	310ms
Fused conclusions	20
Input	PCAP file capture.pcap
Packets analysed	90
Traffic volume	13.62 KiB
Input size	15.05 KiB

Progress Flow

The completed pipeline counters below mirror the dashboard progress view.

Pipeline metric	Final value
Pipeline stage	Completed
Packets processed	90
Bytes processed	13.62 KiB
Flows processed	5
VPN sessions found	1
Security associations found	2
Evidence records	230
Findings generated	1
ML predictions	2
VICI availability	Unavailable
XFRM availability	Unavailable

Traffic Analysis

These values describe observable packet and flow metadata. They do not reveal encrypted ESP payload content.

Traffic metric	Observed value
Packets	90
Bytes	13.62 KiB
IKE packets	0
ESP packets	72
AH packets	0
NAT-T packets	0
Packet drops	0
Traffic Bytes	1870
Traffic Bytes	880
Traffic Bytes	7700
Traffic Bytes	108
Traffic Bytes	3388
Traffic Class	Unknown
Traffic Confidence	0 655
Traffic Confidence	0 66
Traffic Packet Count	8
Traffic Packet Count	50
Traffic Packet Count	2
Traffic Packet Count	22

Flows

Each row is payload-free flow telemetry derived from the uploaded or authorized live capture.

Protocol	Endpoints	Packets	Bytes	Duration
Other	192.168.0.11:138 -> 192.168.0.255:138	8	1.83 KiB	16007 ms
Other	192.168.0.11:137 -> 192.168.0.255:137	8	880 bytes	8003 ms
ESP	3ffe::1:0 -> 3ffe::2:0	50	7.52 KiB	49017 ms
Other	10.0.0.1:0 -> 224.0.0.22:0	2	108 bytes	29021 ms
ESP	3ffe::1:0 -> 3ffe::3:0	22	3.31 KiB	21008 ms

IPSEC / VPN Analysis

The table presents the winning IPsec-related conclusions selected by Fusion from the available sources.

Property	Value	Status	Confidence	Winning source
Child Protocol	ESP	Observed	78.1%	PACKET_PARSER
Child Protocol	ESP	Observed	78.1%	PACKET_PARSER
ESP Spi	0x0000000a	Observed	78.1%	PACKET_PARSER
ESP Spi	0x0000000b	Observed	78.1%	PACKET_PARSER

VPN Sessions

Observed VPN sessions, IKE exchanges, security associations, and NAT traversal are summarized below.

Session	Mode	State	Flows	SPI values
01a08223-5452-70d0-80e...	Passive Pcap	READY	64	0x0000006e, 0x0000006f, 0...
01a08226-4641-73b2-a91...	Passive Pcap	READY	5	0x0000000a, 0x0000000b
01a084d4-8465-73ae-bd8...	Passive Pcap	READY	5	0x0000000a, 0x0000000b
01a084d7-5d94-7756-80f...	Passive Live	STOPPED	0	
01a0852a-ce1a-70fe-ac4...	Passive Pcap	READY	5	0x0000000a, 0x0000000b
01a0852d-893f-781b-95d...	Passive Live	STOPPED	0	

Security association	Protocol	Mode	State	SPI values
0x0000000a	ESP	Not recorded	Not recorded	0x0000000a, 0x00000...
0x0000000b	ESP	Not recorded	Not recorded	0x0000000b, 0x00000...

NAT traversal	Value
NAT-T observed	false
NAT-T packets	0
Evidence status	Unknown
Unavailable reason	No NAT-T observation is available

Passive Analysis

Observed information: packet headers and IPsec metadata were collected without decrypting ESP payloads.

The source contained 90 packets, including 72 ESP, 0 IKE, 0 AH, and 0 NAT-T packets.

Interpretation: conclusions are limited to what the capture exposed. Missing gateway state remains unknown and is not treated as a passing security check.

Traffic Classification

These results are ML inferences from encrypted-flow metadata. UNKNOWN is a deliberate low-confidence abstention, not an anomaly or security finding.

Classification	Count	Share	Avg confidence
Unknown	2	100.0%	65.8%

Evidence

This section mirrors the dashboard evidence view: collection records are kept separate from Fusion's selected conclusions.

Fusion metric		Value
Fusion state		Complete
Evidence count		230
Conclusion count		20
Conflict count		0

Security Findings

LOW - Observable traffic metadata (IPSEC_METADATA_001)

Outer endpoints, timing, direction and traffic volume remain visible despite ESP encryption.

Recommendations

Actions below are derived directly from supported deterministic findings and are ordered by severity.

LOW priority - Observable traffic metadata

Document this residual exposure and use traffic-flow confidentiality controls only when required.

Risk & Fixes

Risk metric	Value
Observed-check score	97/100
Risk level	Low
Assessment confidence	70.0%
Unknown critical facts	6

Risk category	Supported-evidence score
Cryptography	25/25
Authentication	15/15
Key exchange	15/15
PFS	10/10
Replay protection	7/7
Lifecycle	8/8
Metadata	2/5

System Health

This is a point-in-time service and capability snapshot captured when the report was generated.

Dependency	State
In-memory store	READY
Temporary storage	READY
Sensor	READY
ML worker	READY
Fusion engine	READY

Capability	Available

Model loaded	true
Model version	traffic-classifier-291d3300b298
Feature schema	flow.v2
Status	SERVING_STATUS_SERVING

Conclusion

This analysis completed with a security score of 97/100 and 1 supported finding(s). Use the recommendations as the next actions, while treating all unknown or unavailable evidence as unresolved rather than safe.

Appendix: Evidence Conclusions

This technical appendix lists Fusion’s winning conclusions. Status identifies whether a fact was observed, derived, inferred, gateway-verified, or unknown.
